## YOUR PARTNER FOR CLINICAL TRIAL SUPPLY SERVICES IN HUNGARY

Professionals operating within the realm of international clinical trials need to comply with complex legal, regulatory and administrative requirements. Simultaneously, keeping operational costs to the minimum level has become their number one priority.

To optimize processes, international manufacturers and clinical research organizations (CROs) often turn to local companies for procurement and logistics solutions. Recently, Hungary has witnessed a surge in local sourcing activities owing to its competitive price level, reliable supply chain and strong supervisory oversight.

This phenomenon presented an opportunity for qualified pharmaceutical wholesalers to turn into one-stop-shop providers of clinical trial supply services. Based on a wealth of experience in assisting clinical trials internationally, our company has become one of the leading experts of such services in Hungary.

By harnessing the advantages of local sourcing, we assisted several manufacturers and CROs to reduce project costs domestically and become more competitive internationally. As a result, many trials in Hungary now use products that have been sourced, labelled, stored or distributed by PHARMAROAD KFT.

If you are interested in exploiting the benefits that local sourcing offers in Hungary, please contact us to discuss potential cooperation opportunities.

## OUR AREAS OF EXCELLENCE IN CLINICAL TRIAL SUPPLY SERVICES

### ◆ PRODUCT PROCUREMENT

Being a full-line wholesaler with psychotropic and narcotic licenses, we offer prescription, over-the-counter and hospital products as well as a wide array of supplies for medical institutions, such as infusions, test strips, diagnostic equipment, needles, etc.

To sponsors and CROs, we provide a full assortment of clinical trial supplies including analytical samples, comparators, rescue medicine, products for complementary therapy, medical devices, wound-care products and nutritional supplements.

### ◆ WAREHOUSING FACILITIES

Operating out of an ISO 9001 and ISO 14001 certified facility, we offer fully validated, continuously monitored, temperature controlled and alarmed warehousing services for products of various classifications (psychotropic, narcotic, biocides, etc.) and temperature requirements (2-8 °C, 15-25 °C, etc.).

### ◆ LOGISTICS SERVICES

Coordinating a fleet of temperature controlled vehicles, we deliver products cost-effectively to hospitals and medical institutions serving as clinical research sites in Hungary. Our logistics services also include the return and destruction of unused trial supplies.

### ◆ PACKAGING AND LABELLING

Catering for all sizes of batch requirements, we provide tailor-made clinical label design, printing and packaging solutions.

### ◆ DEDICATED PROJECT MANAGEMENT

Every project we manage is supported by a specifically assigned team that consists of GCP trained quality control experts, dedicated customer service representatives and selected picking and packing personnel.
